

Turnagain Ni-Co Project

*Proven Nickel Foundation,
Copper & PGE Exploration Upside*

TSX.V: GIGA | OTCQB: GIGGF | FSE: BRR2

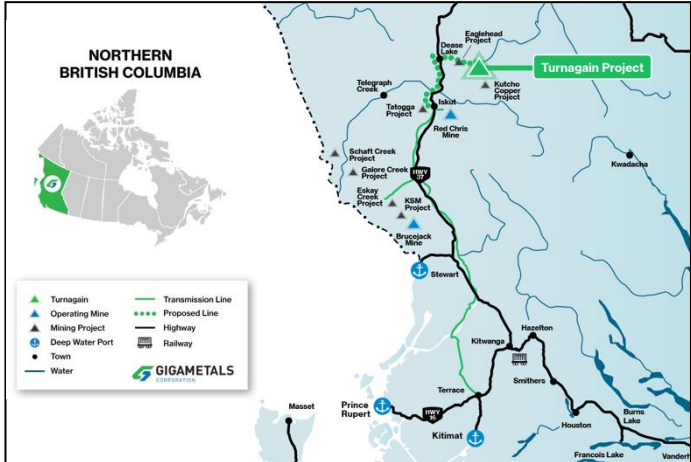

Giga Metals' flagship asset is the Turnagain nickel-cobalt project located in northern British Columbia. Part of a joint venture with Mitsubishi Corp., Turnagain is among Canada's largest undeveloped critical minerals projects.

The Turnagain project offers significant exploration potential, with a current emphasis on copper and PGE mineralization adjacent to the current nickel-cobalt mineral reserve*.

KEY HIGHLIGHTS

- ✓ Joint venture with Mitsubishi Corp., a world-class development partner (Giga majority owner and operator)
- ✓ PFS Study completed in 2023; clear development path forward
- ✓ 30-year project life with typical annual output of approx. 37,000 t/y nickel + cobalt
- ✓ Mining-friendly jurisdiction; proximity to ports; strong First Nations relationship
- ✓ Exceptional exploration potential with ~80% of project area underexplored

| Capital Structure (June 2026) | |
|-------------------------------|--------------------|
| Shares Outstanding | 158,079,721 |
| Warrants | 53,299,240 |
| Options | 9,660,000 |
| Fully-diluted | 221,038,961 |
| Share Price (June 26, 2026) | C\$0.08 |
| Market Capitalization | C\$13M |

*Turnagain Pre-Feasibility Study completed October 2023.

Two Strategic Pathways Driving Shareholder Value

TRACK 1

Turnagain Nickel-Cobalt Project Long-Life, Low-Risk Foundation

- **PFS completed:** Long-life, scalable source of Class 1 nickel
- **Strategic Partnership:** Joint venture with **Mitsubishi Corp.** providing validation and downstream alignment
- **Government Support: Federal and Provincial** support for critical minerals
- **ESG-focused design:** hydroelectric power, CO₂ sequestration, modern tailings design

TARGET: De-risk project through to Environmental Assessment, construction

TRACK 2

Unlocking Potential Targets Optionality & Discovery-Driven Growth

- **Geological Expertise:** renowned geologist **Dr. Stephen Beresford** engaged to evaluate exploration data
- **Target Potential:** Early evidence of **potential copper mineralization** outside main resource
- **Untapped Land Package:** ~80% of property remains unexplored
- **Current Program:** Second phase MT survey, EM and potential drilling

TARGET: Generate new discoveries and enhance overall asset value

Completion of these milestones are subject to financing and continued success in project evaluation.

World-class, responsibly-sourced critical minerals with significant exploration potential
